

THE GOOGLE REVIEWS ENGINE

More stars on Google. More new customers.

Guests choose where to go based on Google reviews. After every visit, Loyavi invites your guest to rate their experience — and routes it smartly: good ratings go to Google, bad ones stay private, with you.

**3 stars or fewer**

Stays with you as private feedback — the guest never reaches Google. You learn what needs fixing before it goes public.

**4 or 5 stars**

One tap posts it to Google. Your average rating and review count grow every single day — automatically, no begging.

- ✓ **Intercepts unhappy guests before they post publicly.**
- ✓ **Sends happy guests straight to Google in one tap.**
- ✓ **All private feedback collected in your dashboard.**

THE LUCKY WHEEL

How do you win a guest? With a gift.

The hardest part of any loyalty programme is the first step. Loyavi solves it with play: on their first visit, a new guest spins the lucky wheel — and always wins something.

- ✓ **Guests always win — you set the prizes and the odds.**
- ✓ **The coupon activates only after the first scanned receipt — nobody gets a reward without a real visit.**
- ✓ **Spinning registers the guest — instantly in your database.**
- ✓ **You can also embed the wheel on your own website.**

EXAMPLE: A CAFÉ WITH 80 RECEIPTS A DAY

≈ 720 enrolled guests a month → ≈ 430 extra visits

≈ €1,700 in extra revenue per month (at a €4 average ticket)

Conservative estimate: about 30% of guests enrol, each making about 0.6 extra visits a month.
